Wind

- In June 2016, the total wind production was 5% below estimates.
- In particular, due to poor wind conditions, production generated was lower than expected in almost all our countries, except in Spain, where the production was higher than expected (+15%) and extremely higher compared to June 2015 (+40%).
- Net wind production year-to-date was 6% higher than estimates and fairly higher than the same period last year.

Solar

- In June 2016, the solar production was in line with expectations.
- In particular, the average irradiation was in line with estimates both in Italy and Spain.
- Net solar production year-to-date was in line with estimates and with the same period last year.
